DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-14 drawn to components of an apparatus, classified in class 361, subclass 761.
 - II. Claims 15-27, drawn to a method of making an electronic package, classified in class 29, subclass 830 plus.
 - III. Claims 28-32, drawn to a process of making the electronic module which includes a multilayer circuit board that electrically interconnected to a substrate, classified in class 29, subclass 830 plus and class 427, subclass 96.1.
- 2. The inventions are distinct, each from the other because:
- 3. Inventions III, II, and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the process of making the product can be used to make a different product other than the microstimulator electronic package by changing the integrated circuit and the conductive traces on the redistribution layer.

Art Unit: 2841

4. Inventions II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it does not required all the details of invention III, such as the details of the ground layer. The subcombination has separate utility such as a second layer of insulation on the ground layer and the ground layer is electrically connected to the integrated circuit.

- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for each invention is not required for other inventions, restriction for examination purposes as indicated is proper.
- 6. A telephone call was made to the applicant's attorney, Ms. Laura Haburay Bishop, on 29 July 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.
- 7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2841

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoa C. Nguyen whose telephone number is 571-272-8293. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kammie Cuneo can be reached on 571-272-1957. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
